To the FCC,
With regard to the NAB's recent petition 04-160, I wish to express some comments. I am an XM radio subscriber. I pay, by my choice, to hear what entertainment and information is available from them. I live in a rural area, and am very much underserved by broadcast radio. The availability of weather and traffic information in a city to which I plan to travel, is invaluable to me. Also, I am able to hear music and information literally from around the world, something that would otherwise never be available to me.

I urge you reject the NAB's petition and continue to allow me, like over a million others, to elect to pay for such a quality service.

Respectfully,

John Wooden
